

# AMARILLO TANKS

## FUEL AND OIL TANKS

### EXCEPTIONAL CRAFTSMANSHIP, TIME-TESTED DESIGNS

The Amarillo Tanks engineering team has created a distinct line of above-ground fuel and oil tank systems for a variety of application uses. Our products are handcrafted with attention to detail to add peace of mind to your petroleum and chemical storage. Choose original carbon steel or Underwriter's Laboratories(UL)-approved carbon steel construction. UL-approved carbon steel provides added peace of mind as it meets all Underwriter's Laboratory criteria for above-ground storage of flammable and combustible liquids. Amarillo Tanks carries several standard tank designs in stock for immediate delivery, but customized tanks can also be manufactured to your exact specifications.

### DOUBLE-WALL TANKS

When it comes to chemical protections, one wall is good but two is better. Our double-wall fuel and oil tanks provide the optimum environmental protections for added peace of mind. Amarillo Tanks' double-wall design is essentially a tank within a tank — perfect for temperature-sensitive chemicals. These tanks keep fuel and oil stored securely until you need them.

GALLON CAPACITY	DOUBLE OR SINGLE WALL	CARBON STEEL		UL-APPROVED CARBON STEEL	DIAMETER	LENGTH
150 gal.	Single	14 ga.	<b>OR</b>	12 ga.	30 in.	60 in.
275 gal.	Double	14 ga.		12 ga.	39 in.	60 in.
298 gal.	Single	14 ga.		12 ga.	38 in.	60 in.
500 gal.	Double	12 ga.		12 ga.	47 in.	72 in.
520 gal.	Single	12 ga.		10 ga.	46 in.	72 in.
1000 gal.	Double	12 ga.		10 ga.	47 in.	144 in.
1036 gal.	Single	12 ga.		3/16 ga.	46 in.	144 in.

### ADD-ON OPTIONS

- Ladders (available depending upon depth)
- Pumps
- Hoses
- Filtration systems
- Meters
- Containment pans
- Lockable doors with adjustable T-handle latches

### UNIVERSAL FEATURES

- All can be mounted on skids and/or overhead stands
